o.montescamberos@gmail.com

Senior Software Engineer with 7+ years of experience building web, mobile, and cloud-based products. Experienced in end-to-end delivery across React, TypeScript, Node.js, PostgreSQL, Redis, AWS, GCP, and real-time and AI-enabled product workflows. Strong focus on scalable user-facing platforms, performance, reliable delivery, code quality, and close collaboration with Product, Design, and Data.

Core Skills

- **Frontend:** React, TypeScript, Next.js, Vue.js, Vuetify, AngularJS, Tailwind CSS, Ant Design
- **Backend & APIs:** Node.js, Express, GraphQL, REST APIs, TypeORM, PostgreSQL, Redis, SQL Server
- **Cloud & Delivery:** AWS (Amplify, ECS/ECR, EC2, RDS, SQS, Lambda), GCP (Cloud Run, GKE, Compute Engine, Cloud Functions, Build, Storage, VPC), Docker, CI/CD, Linux
- **Real-Time & AI Products: WebSockets, Server-Sent Events (SSE), streaming output patterns, long-running job state, LLM integration patterns**
- **Mobile:** Swift, Java, Flutter, Realm, CameraX, Room
- **Quality & Collaboration:** Jest, Cypress, Playwright, GitHub, Figma, technical documentation, code reviews, Agile/Scrum

Professional Experience

DaCodes — Senior Software Engineer

Dec 2024 – Sep 2026 · Remote

Software consultancy delivering and embedding engineering talent within product teams in fintech, AI, and data-intensive startups. Owned end-to-end delivery on long-term client engagements, from architecture and implementation through performance work, code review, and cross-functional planning.

Client engagement: Heron Intelligence — Senior Software Engineer
Dec 2024 – Sep 2026 · Remote

- Built the client-facing full-stack platform used by institutional investors—including hedge funds, private equity, venture capital, asset managers, and insurers—to read transcripts, navigate management-intelligence workflows, and generate AI-driven research, including backend development with Express.js.
- Built a real-time, RAG-powered AI chat experience across a database of 100K+ proprietary interviews and 5K+ companies, including streaming output, long-running job state, and presentation of model results for a high-stakes financial context.

- Optimized database queries and layered client- and server-side caching to accelerate high-volume research and platform workflows.
- Built a complex personalized-watchlist and specialized company-tracking system for institutional-investor research workflows.
- Strengthened security for online payment systems powered by Stripe.
- Designed and shipped real-time notification systems using WebSockets and Server-Sent Events (SSE), replacing a polling-based flow.
- Built the Heron Intelligence dashboard from the ground up: a complex institutional-investor research workspace with configurable widgets, resizable and customizable data tables, and specialized research workflows.

Core stack: React, Next.js, TypeScript, Node.js, PostgreSQL, Redis, AWS, WebSockets, Server-Sent Events (SSE), LLM integration patterns.

Jonajo Consulting — Senior Software Engineer

May 2021 – Dec 2024 · Remote

- Delivered web and mobile solutions using React, Next.js, Node.js, GraphQL, Firebase, Docker, and cloud services.
- Applied CI/CD and cloud delivery practices across AWS and GCP, including EC2, IAM, S3, RDS, SQS, Lambda, CloudWatch, CodePipeline/CodeBuild, Cloud Run, Cloud Build, VPC, Docker, and Linux administration.
- Built mobile applications with Swift, Java, and Flutter, emphasizing robust offline functionality and integration with platform services.
- Collaborated with designers to translate Figma designs into production web and mobile experiences; applied modular architecture, MVC patterns, and Agile/Scrum practices.

Selected client projects

- **Silvermine — Front-End Engineer** *(Oct 2023 – Oct 2024)*: Improved tax-payment flows and SEO for a U.S. truck-driver tax platform through SSR; supported AWS cost optimization and resolved production issues using AngularJS, React, Next.js, SQL Server, SQS, and RDS.
- **GlamScan — Full-Stack / iOS / Android Developer** *(Aug 2021 – May 2024)*: Built web and mobile capabilities for an AR nail-polish try-on product using React, GraphQL, MongoDB Atlas, Docker, and GCP Cloud Storage, Cloud Run, VPC, Compute Engine, and Kubernetes.

Prime Consultoría — Full-Stack Web & Mobile Developer

Jan 2021 – Sep 2024 · Remote

- Developed web, mobile, and automation solutions using Node.js, Vue.js, Flutter, .NET/SOAP services, SQL Server, Cloud Run, Puppeteer, Playwright, and scheduled jobs.

- Built operator and technician workflows for Villa Avocado Maintenance, integrating a .NET SOAP service with SAP Business One for issue reporting, equipment verification, work-hour logging, and revision requests through push notifications.
- Built the Villa Avocado SOLPEDs reporting dashboard with paginated, sortable, and filterable data tables using Vue.js and Vuetify.
- Developed a Node.js automation bot that retrieved exchange-rate data from Banxico and updated SAP through its Service Layer REST API.
- Built PEMEX automation bots on Cloud Run and AWS Lambda, scheduled jobs with NodeCron, and implemented failover strategies.

Universidad de Guanajuato — Web Developer (Temporary Contract)

Sep 2020 – Nov 2020 · Salamanca, Guanajuato, Mexico

- Designed and implemented a website for the university's special laboratories.

Mope IT — Full-Stack Web Developer (Temporary Contract)

Aug 2019 – Mar 2020 · Irapuato, Guanajuato, Mexico

- Developed an administration panel for reporting, system configuration, driver management, and service operations for a home-cleaning services company.
- Built Node.js and Express services and collaborated on secure REST API authentication for Android and iOS applications.
- Integrated online card payments with OpenPay, Google Maps services, and Firebase authentication, notifications, Firestore, and Realtime Database.

Education

Universidad de Guanajuato — Systems Engineering
Aug 2016 – 2021 · GPA: 9.0/10

Languages

Spanish: Native
English: Fluent / Professional working proficiency
